

Basic Photography Workshop

Saturday 5th July : 9am - 4pm Strictly limited to 10 participants

Taking Better Photographs ... Suited to Beginner - Intermediate Photographers

Members are invited to join John Doody on a full day Photography Workshop.

As much as possible this workshop will be hands on and practical. The workshop will include a combination of PowerPoint presentations, Practical demonstrations and Hands-on photography.

Most sections will have one or two directed exercises where the participants will be asked to photograph something specific or in a specific way. The purpose of the exercises will be to photograph to achieve a particular result rather than leaving the result up to chance.

Example Directed Exercise:

Photograph a scene in which you include the compositional elements, rule of thirds and leading lines.

The resulting photographs from each exercise will be downloaded and discussed.

Course Outline

What is a good photograph?	<ul style="list-style-type: none">■ Discussion of what are the components of a great photograph■ Creating impact in a photograph■ Elements of Composition and when to break to the rules
